Check clear and clear screen recordings and Camtasia capture frame speed. save a recording encoder (only Windows): consider the most recording encoder:rtseum racsub y sovilcra ratropmi ranoiceles somedop ececrapa on euq ed osac ne orep sodatropmi sovlicra ed amatex al ne ececrapa son odarutpac oedÁv le somadraig zev anU .cte .senoisnemid sal rigele .oedÁv ortseun ratide somedop ednod amarqorp led lapicnirp allatnap al a vloved son y oteyorp le radraig somedop Áuqa :ratide y radraigG .senoicpo 3 somenet odasiver zev anu Y .opmeit ed aenÁl al a etnemacti;Ámotua ¡Árida±Áa es n'Áicabarg aremirp uT .n'Áicabarg al ed sadaesop onenoices o serorre ranimilE serorre ratroC .oedÁv le ne salriulcni arap opmeit ed aenÁl al a soidem ed otneimidnetne led ovlicra le artsarra .senoicabarg setneiguis sal nE .s¡Ám othcum y setocfe .senoicatona .solutÁt noc soedÁv sut a ovitcarta y lanoiseforp euqot nu elad .amix¡Ám arutpac ed samargotof ed dadicolev al ecelbatse .dadilac ed oedÁv ed n'Áicabarg anu razitnarag arap :)swodniW olos( omix¡Ám samargotof ed dadicolev al recelbatsE .htooteu!B onofÁrcim nu ed zev ne BSU rop odatcenoc onofÁrcim nu asu .n'Áicarugifnoc al rarojem arap .odatcenoc BSU onofÁrcim nu noc rabarG .sotcerid soirosecca razilanosreP atlasnoC .solutÁt y solutÁr .senoicatona rida±ÁÁ atlasnoC .n'Áicabarg al raznemoc a dadiroiretna noc sedadilaoicnuf satsre ravitca somerebed orep .sodaerbmos o solucrÁc .sodardauc .sahcelf omoc n'Áicabarg artseun a serodacram rida±ÁÁ etimrep son allaf atsEslooTaisatmaC ed senoisrev sal sadot noc selbitapmoc macbew serojem soLnozamA ed sonofÁrcim noc seralucirua serojeM .odneicudorper atse es euq oidua le neib ebarg euq arap selevin sotla a rodalortnoc etse renet elbajesnoca sE .etroc le odazilaer ah ednod sotnup ed aenÁl anu s¡ÁreV .n'Áicces al ratiuq arap ratroC onoci le ne clic zaH .ranimile sareiuq euq aer¡Á le ranoiceles arap n'Áiccudorper ed lazebac led edrev o ojor lortnoc le artsarrA .n'Áicabarg anu ed lanif le o oicini led lanoicida odinetnoc reiuqlauc ranimilE serorre ratroceR .462H le o adanimrelederp 2CST le sit arap to proceed to edit the video. Produce: allows us to save the project in the format of camtasia to work with it later. Delete: if the video does not convince us and we want to delete it we have this option in camtasia. If we have our screenshot we can export it or if we have to make any changes proceed to edit the video. How to edit videos with Camtasia The first step to start editing videos with Camtasia is to choose the files we want to edit, so we should go to "Import files" and select the videos, images and audios we want to incorporate into our project. Once we have the files in our project it is as simple as selecting them and dragging them to the video or audio track of our project located in the lower part of the program. Because of the number of video and audio tracks we should not worry as we can create needs as needs. By dragging the video clip we should choose the size in which the work of our video, we have the options mentioned above: 1080p HD (1920×1080), 720p HD (1080X720), 480p SD (854×420), 1024×768, 640×480. If we are creating a video for Youtube the most suitable format is 1280×720. With a simple click we activate or turn off the sound capture. Camtasia Studio 9 is a free program for video editing that allows recording the computer screen. Click to select the recording on the timeline. Drag the end of the clip into the inside. To restore the video if it has been clipped too much, drag the end of the clip back out. When you are finished and want to export or share the video, click the Export button on the top right corner of the editor and select a destination. Set up the recording Select the recording area: Click the switch to activate or disable theclick on the drop-down and select a recording area option.Camtasia highlights the selected recording area on the screen. double-click the playback head to attach the green and red controls. Although it is an option that we do not support because of the illegality and the little recognition that this entails for the creators of the best desktop recording program that is currently on the market.How to record the computer screen by following a few simple steps that we will teach you you will learn to make a screenshot of your PC in a simple way, although before you have to make a series of basic configurations. Once we have accessed the program we simply have to go to the top left of the program and click on "record screenÁ», made this step we open a second tool where we will make the respective settings to carry out the recording.Select areafull screen: when selecting this option it tells us that the screen will be captured in full form. On the menu bar, select the camtasia icon to hide icons from the desktop.Download a sample recording to test the audio:There is no audio from the microphone: select an audio device on the dropdown or activate the Microphone option on the recorder:There is no audio from the system: activate the audio option placed on the audio recorder Customize direct access: accelerate your workflow with the direct accesses of the recorder. With the mouse we will be able to move the different clips to put them together and create continuity.We will show you a video in which you can learn to edit video with camtasia Studio:Depending on the view of the program thatInstalled on your computer, some software features are likely to change, but if you download the last versions: Camtasia Studio 8 and Camtasia Studio 9 The options are almost eliminated to those shown in this tutorial. In the Camtasia recorder, select the Menâ® tools á`sá % ¥ preferences á`sá % masters recording encoder inputs. To edit the recording creep: drag the controls to adjust the selection. To indicate a concrete size, write the dimensions in pages in the width and height fields. If we want the sound to record well we must ensure that it is activated and with the micro -phone options (High Definition Audio) and record marked audio system. Volume control: We finally have a controller to raise or lower the audio level during recording. The TEC recording file appears in the media account. Click and brace them from the tool panel to the time line or the canvas. Suggestion: I undo a selection. The audio audio captures the audio of the equipment, such as the alerts of the applications or the audio that is reproducing the computer speakers. To move the selected one on the screen, click on the central control (Windows) or inside the selected (MAC) and drag until the desired location. If the computer is connected to several screens, you can drag the selected one from one screen to another. To record the void of the website from a integrated or connected Cámara device, click on the switch to activate or deactivate the recording of the web maple and select a Câmara device in the member . The cuts do not affect the original recording in media understanding. The different program also provides size to choose: 1080p HD (1920â - 1080), 720p HD (1080x720), 480p SD (854â - 420), 1024â - 768, 640â - 480. off: by default it is disabled but we can activate it with a simple click so that the webcam records our image and appears on the screen.Audio on: in the same way we can disable the audio. to record audio from the integrated computer microphone or from a connected ob microphone: click on the switch to activate or deactivate the microphone recording and select an audio device on the drop-down. Drag the slider to increase or decrease the audio level.Active or deactivate the system audio. view recording and editing web cameras (image inside image.) suggestions for recording hide icons from the desktop (only mac): before recording the desktop, hides the icons from the apps, folders and files. At that time a fast account will appear and when it comes to zero anything we show on the screen of our computer will be recorded. During the recording we are told in the tool the time or duration we have recorded, and we have the usual "pausa" and "stop". Add titles, annotations, effects, etc. skip to content in this tutorial we will discuss the following themes: record the screenshow the recordingExport and share the screen the camtasia recorder captures the screen, the web camera and the audio. edit your recordings quickly to delete errors and perfect your video, with the first only "stop" the recording and allow us the option to continue it further and with the "stop" we end the recording definitively. Once we have stopped the recording, we skip a preview window where we can review what we have done. Start recording:Windows: click on the button to record or press f9 on the keyboard.Mac: click on the button to start recording or click +May+2 command on the keyboard.Stop recording:Windows:Click the button.allatnap .allatnap ed nÁ'Áicabarg al arap aisatmaC ne 462H o 2CST rasu odnÁ¡ÁuC atlasnoC .allatnap artseun rarutpac a odazepme someh zev anu selbinopsid nÁ¡Átse senoicop satsre euq a ebed es otse .oibmac nÁ¡Ágnin somavresbo On the ooffline .COOLever salm móf embone món embanne , Quan ) Answers Quad ) Quad ) Answers Quad ) Answers Quanfy.
